Auto High-Speed Vertical L-Bar Sealer and Shrinking tunnel

This high-speed vertical up-and-down sealing and shrinking machine is built for refined cosmetic film packaging, especially high, thin products. It automatically handles feeding, film wrapping, sealing, cutting, and shrinking — keeping the seal line centred and thin with automatic film blowing for a clean finish. The result is smooth, wrinkle-free shrink packaging with no manual operation needed. Running at 5–60 pcs/min, it delivers strong throughput for demanding production lines. Compatible with POF and cross-linked film, it also suits printing, colour box, pharmaceutical, daily chemical, auto parts, and food packaging applications.
