COSMETIC/PHARMACEUTICAL PRODUCT FILLING & CAPPING SYSTEMS

This machine has the following functions: Cleaning, Filling, Pump Placing, Crimping and Capping.

- The machines are easy to operate and can accommodate glass, plastic and PET bottles.
- Different product pumps are available to cater for various products and applications.
- Capping speed and torque are adjustable from the touch screen.
- Safety features like overloading, safety doors, low air pressure and product malfunction protection form part of the system.
- These machines are ideal for the cosmetic, pharmaceutical and e-liquid industries.
