Lip Gloss Filler, plug and Capper

Parameter	Value
Main motor power	0.75KW
Production capacity	40 pcs/min
Filling volume	5 - 20ml
Air supply pressure	0.6 - 0.8Mpa
Dimension	1750×1650×1820mm

The PLJM-1647M is designed for the automatic filling, plugging, and capping of lip gloss, liquid lipstick, and similar cosmetic products.

It features PLC controls with adjustable filling settings and integrates all three processes into a single machine.

Suitable for small- to medium-scale production, it operates at speeds of up to **40 products per minute**.
