SHRINKING TUNNELS SYSTEMS

- **Semi-automatic shrink wrapper** where the products are placed in the front and a button activates the pneumatic pusher.
- After the bottles are pushed forward a heat sealing bar seals and cuts the plastic.
- At the end of the conveyor the fan cools the heated plastic.

- The red lever must be pulled in order to let the product be cut and sealed.
- No compressed air required for this machine.
- After the products are cut and sealed it goes into the shrinking tunnel where the plastics melt and the fan cools after.
- 500MM width and 360MM in height (shrinking tunnel.)

- **Manual infeed sleeve sealer and shrink tunnel combination.**
- The products gets cut and sealed, then goes into the shrink tunnel which heats up the plastics and shrinks unto the product. After that the can cools the heated plastic.
- 500MM width and 360MM in height. (shrink tunnel.)
